## Specification for the repair of two bus shelters on the A5093; The Hill and The Green

Quotations are invited from suitably qualified builders to repair two local bus shelters. The work required is as follows:

### The Hill Bus Shelter

- clear out and remove all weeds, brambles, ivy, tyres, rocks, tree stump and other rubbish from the back and ends of the shelter
- sweep out the interior
- clean the dashed front and two ends with sulphate of iron or red label hydrochloride
- renew the wooden shelf (which has woodworm) approx. 49" x 18" (This is used daily for newspaper collection by residents.)
- replace one missing glass pane with **min 4mm** Perspex approx.18" x 11"
- replace window putty where appropriate
- rub down and suitably repaint (topcoat **BLACK**) the internals of the 52 windowpanes
- strip and apply three coats of paint to the external part of the 52 windowpanes. Topcoat to be **PILLAR BOX RED**.
- clean the timetable frame and the bus stop sign and pole

### The Green Bus Shelter

- Sweep floor and walls
- Brick up the missing mullion space in the middle of the lower half of the front façade (approx. 6" x 4" x 38") and cover with dash to match existing
- remove the rotten right-hand window frame and replace with a new wooden one (approx. 77" x 38" with a wooden mullion (3" x 4") in the middle of it)
- supply and fit two pieces of **6mm** Perspex into the new frame
- cut out small sections (bottom left and right-hand corners) of the existing left window frame and make good with timber and external grade wood filler
- rub down/scrape old varnish as necessary; apply three coats of paint to all window frames. Topcoats: Inside **BROWN**; outside: top purlin (approx. 22') and two end uprights (approx. 6'6") to be **BROWN**. External window frames **PILLAR BOX RED**
- clean the pebble dashed front with sulphate of iron or red label hydrochloride
